SUMMARY

Motivated Computer Science graduate with a strong foundation in software development, scripting languages, and database systems. Passionate about solving complex business problems through innovative and scalable solutions. Eager to contribute technical expertise, creative problem-solving skills, and a collaborative mindset to develop high-quality software solutions in a dynamic and growth-oriented environment.

EDUCATION

Master's in computer science - University of North Carolina at Charlotte, NC, US - Jan 2023 - Dec 2024 - GPA: 4.0

Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Big data Analytics, Cloud Computing, Intro to Natural Language Processing, Artificial Intelligence (Intelligent Systems).

Bachelor's in computer science - Acharya Nagarjuna University, AP, India - Jul 2016 - Aug 2020 - GPA: 3.75

SKILLS

Programming Languages - Python, Java, C++, SQL, JavaScript

Web technologies - HTML, CSS, React, Redux, Node.js, Express

Database Systems - MySQL, MongoDB

Tools/Technologies - Git, Docker, AWS (EC2, S3), REST APIs, Tableau, IBM BPM/BAW

Soft Skills - Problem-Solving, Critical Thinking, Communication, Team Collaboration

EXPERIENCE

Software Engineer - Tata Consultancy Services, Bangalore, India - Oct 2020 - Nov 2022

- Developed and maintained scalable backend workflows using IBM BPM, reducing claim processing exceptions by 30% through validation logic and state handling
- Improved onboarding report performance by 60% by optimizing MySQL queries and adding indexes to high-usage tables.
- Implemented a lightweight frontend module using HTML, CSS, and JavaScript to support escalation tracking and filtering, helping reduce ticket volume during sprint cycles.
- Designed and streamlined RESTful APIs and microservices to support seamless backend integrations and cross-functional collaboration.
- Collaborated with the claims team to redesign reporting logic using conditional joins and subqueries, ensuring 100% data consistency in daily dashboards.
- Mentored junior developers by sharing expertise in JavaScript and current testing methodologies, fostering team growth and technical excellence.

Software Engineer Intern - Incline Inventions Pvt Ltd, Hyderabad, India - May 2019 - Jun 2019

- Developed an AI-powered anomaly detection system using Python and Bayesian probability models, identifying critical expense discrepancies with 98% accuracy for Fortune 500 clients.
- Partnered with UX teams to create a React-based interface for data visualization, enhancing stakeholder engagement by 25%.

PROJECTS

Facial emotion recognition - Given a facial image, detecting the emotion expressed in the face. Implemented using Machine Learning, Deep Learning, HaarCascade and OpenCV.

Portfolio - Created portfolio using React and ExpressJS, published through Github pages.

Tech Trade Web application - Developed a website for trading items like phones, laptops and other gadgets among users. Implemented using Javascript, nodeJS, ExpressJs and mongodb

Carpooling Web Application (In Progress) - Creating a Web application where users can ask for rides, post rides and check all available rides. Using Python, MySQL and Streamlit.

Sentiment analysis for Twitter Data - Developed a text classification model using Python and Keras, applying NLP techniques for sentiment analysis and document categorization.

CERTIFICATIONS

MongoDB for SQL Professionals from MongoDB.

AWS Certified Solutions Architect – Associate (In Progress) from Amazon Web Services.

Certified in Machine Learning course by Stanford University Online through Coursera.

Certified in Design and Analysis of Algorithms course by IIT Madras.
